

We extrude for your business.

Movex® is a dynamic and flexible business reality that have been active in the industrial production for over ten years and is reaching market leadership as a reliable and precise supplier, planning the future without losing sight of its history and the values that allow its growth.

In the dedicated extrusion center from our production plant in Castelli Calepio (Italy), **Movex®** provides a new generation of high-performing profiles, developed and produced with the most updated technologies. Experienced engineers work around the clock on more than 50 extrusion machines (horizontal and vertical) to perfect almost 2000 high quality products for our customer needs.

Movex® meets your needs for standard and custom made products in a dynamic and responsive way, ensuring the best performance to satisfy our customer requirements.

Choose the one that best suits you.

Each of the hundreds **Movex®** profiles are produced from a first rate of **UHMW-PE** with the possibility to further enhance performance by using our patented materials **BluLub®** and **Titanium White®**.

Transportation is a delicate phase for your shipment; to ship your order we choose the correct protection: carton, coils, reinforced wooden crate, packaging varies depending on the article typology, its size and its weight.

Standard or customized extrusion...your choice.

Movex® is driven by the will to design and manufacture top quality items, combining technical performance and design, in order to offer its customers a tailor made service.

Beside of the standard available profiles, **Movex®** is also developing together with the customer innovative special solutions to offer *“the product you need when you need it”* against an attractive price. We have organized a specific workflow, developed over the course of the last ten years, which aims to satisfy the requirements of even the most demanding buyer. Get in touch with us and ask a personalised quotation.

Choose the performance of innovative material.

BluLub® is the Movex super-performance compounded Ultra High Molecular Weight Polyethylene material, with the latest generation of solid lubricants, able to contribute improving PV-properties (limiting pressure velocity) compared to standard UHMW-PE, especially in applications with limited lubrication, higher speeds and/or higher loads.

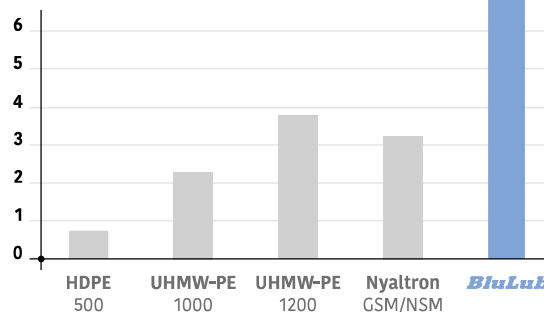

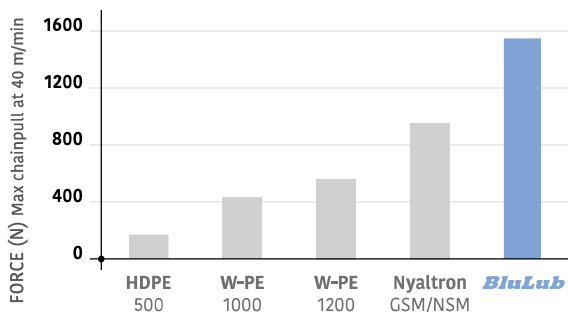

BluLub® ensures high wear and abrasion resistance, requires less energy and with the lowest coefficient of friction, improves the product stability and wear life of sliding parts.

Thanks to the **BluLub®** characteristics, the extruded profiles can also offer a longer wear life, compared to traditional materials, and will help reducing marks over products or goods sliding on them; at the same time, **BluLub®** is also ideal for extreme conditions in terms of load and speed.

More material information and technical data sheet can be provided on request, get in touch with us for a quick support.

The right choice for:

- Lowest coefficient of friction
- Reduced noise and squeaking
- Lowest wear and minimized energy consumption
- Minimal moisture absorption
- Extreme material performances
- Best lubricant distribution

BluLub® is available for any type of profile, standard or custom.

Properties:

- UHMW-PE Polyethylene with molecular density 9,200,000 g/mol.
- Operating temperature: -40 to + 80°C (-40 to 176°F)
- Linear expansion coefficient: $2 \times 10^{-4} \text{ } ^\circ\text{C}^{-1}$ ($1.1 \times 10^{-4} \text{ } ^\circ\text{F}^{-1}$)

Titanium White®

High quality, bright white extrusions.

Titanium White® is the latest addition in the Movex's extrusion compound family. The name **Titanium White®** refers to the special metal because it has comparable unique properties, like high strength and optimum performance, generating low friction, absorbing heat and reducing energy consumption.

Titanium White® has a long lasting bright white color and keeps performances also after many hours of work. Thanks to the **Titanium White®** characteristics, the extruded profiles are made of an intense white UHMW-PE, resulting in a smoother surface and devoid of push marks, meaning in a minimized power consumption and possible goods defect. **Titanium White®** has also an improved UV and aging resistance and a high chemical resistance.

More material information and technical datasheets can be provided on request, get in touch with us for a quick support.

The right choice for:

- Lower coefficient of friction
- Lower wear and less energy consumption
- Minimal moisture absorption
- UV & aging resistance
- High chemical resistance

Ti-White®

22 3d²4s²

Titanium

47.867

Strong metal with low density that is quite ductile, lustrous and metallic white in color.

All these features reflect our extruded profiles with **Ti-White** compound.

Ti-White (Example of application)

Titanium White® is available for any type of profile, standard or custom.

Properties:

- UHMW-PE Polyethylene with molecular density 9,200,000 g/mol.
- Operating temperature: -40 to + 80°C (-40 to 176°F)
- Linear expansion coefficient: $2 \times 10^{-4} \text{°C}^{-1}$ ($1.1 \times 10^{-4} \text{°F}^{-1}$)

UHMW-PE

Standard extrusion polyethylene.

Standard profiles are all made with a first-rate **UHMW-PE** polyethylene, a thermoplastic polymer with a variable crystalline structure with a vast range of applications.

UHMW-PE is available in several colors and lengths. It's the perfect choice to reach your line-performance against an attractive price.

The right choice for:

- Low coefficient of friction
- Good resistance to wear consumption
- Attractive market price
- Long durability

Standard colors*:

Black

Blue

Green

Grey

UHMW-PE is available for any type of profile, standard or custom.

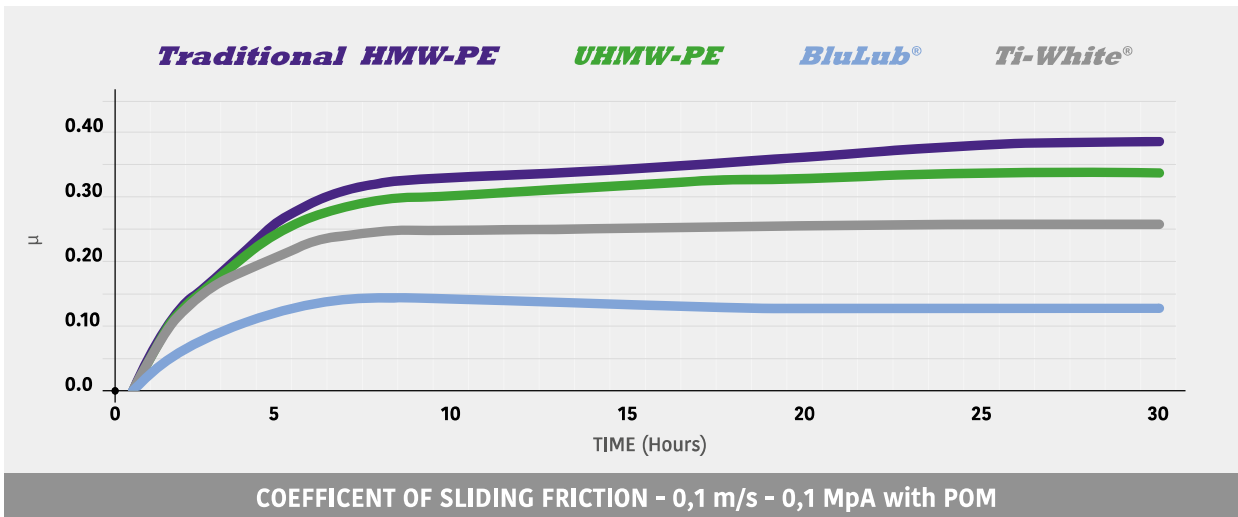

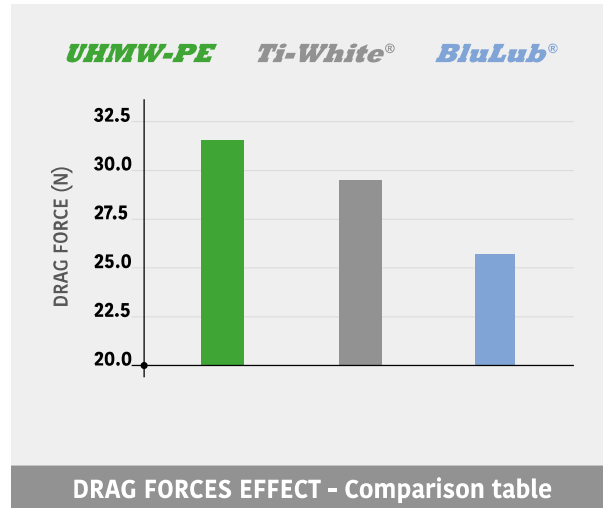

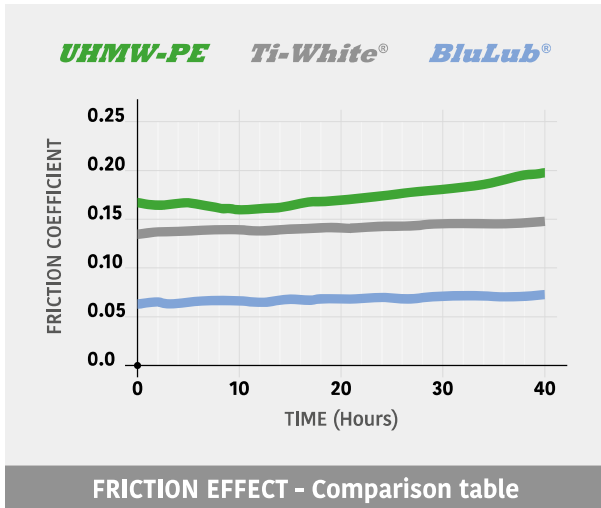

Properties:

- UHMW-PE Polyethylene with molecular density 5,600,000 g/mol.
- Operating temperature: -40 to + 80°C (-40 to 176°F)
- Linear expansion coefficient: $2 \times 10^{-4} \text{ } ^\circ\text{C}^{-1}$ ($1.1 \times 10^{-4} \text{ } ^\circ\text{F}^{-1}$)

*Other colors are available on request.

Material selection

Movex offers different materials and design solution for each customer requirements. These comparison tables help to better understand each material and take advantage of their strengths and features to suit your specific needs:

Ti-White® VS Traditional HMW-PE

This material can keep its color properties stable during the time. Moreover, titanium gives better sliding properties than traditional material.

BluLub® VS Traditional HMW-PE

Thanks to the unique solid lubricant added into the material, the sliding properties are excellent and energy consumption will be reduced.

RS SIDE GUIDE RAIL

Easy and modular replacement label saver system.

RS Side guide profile is a development which enable you to simplify your business!

Thanks to the replaceable wear-strip in **BluLub®**, **RS Side guide profile** can reduce total cost of ownership: in case of required maintenance, only **BluLub®** strips can be replaced, saving time at a lower cost.

Different profiles are available from stock and can be mounted in different ways to optimize the support of your product according to the specific needs.

Increased performance

BluLub® wearstrips contribute to a lower friction which results in less energy consumption.

Fast and easy maintenance

Thanks to its innovative design, the easy replaceable **BluLub® wearstrips** meets the needs to reduce maintenance time.

Interchangeable wearstrip

Every **BluLub® wearstrip** has the same fixing system, this makes all versions interchangeable. In case of required replacement, wearstrips can be ordered as coiled spare parts.

No gap between connection

BluLub® wearstrip allows you to connect two or more different base profiles with no gap, by simply slide it in.

The right choice for:

- Innovative equipment
- Total cost reduction
- Less energy consumption
- Improved product stability

RS Side guide rail profiles

are available in various executions.

Materials:

- Base profile: **UHMW-PE** (see details).
- Label saver: **BluLub®** polyethylene UHMW-PE with molecular density 9,200,000 g/mo. with reduced coefficient of friction and higher wear resistance and its complies with the code of Federal Regulations of FDA (see details).

Material: Resina acetica / Acetal Resin / Azetal or **BluLub**.
 Polyethylene UHMW-PE with reduced coefficient of friction and higher wear resistance.
 BluLub complies with the code of Federal Regulations of FDA. Linear expansion coefficient:
 $1.1 \times 10^{-4} \text{ } ^\circ\text{F}^{-1}$ ($2 \times 10^{-4} \text{ } ^\circ\text{C}^{-1}$) Operating temperature: -40 to 176°F (-40 to +80°C)

363 Guida a rulli flessibile

Flexible roller guide / Flexible Röllchenführung

RANGE EXTENSION

Delivery: **Easy** **Standard**

| Part | Article-Nr. | Type | A | Colour |
|------|-------------|------|----|--------|
| 363 | 36301 | A | 8 | White |
| 363 | 36302 | B | 8 | White |
| 363 | 36303 | A | 10 | White |
| 363 | 36304 | B | 10 | White |
| 363 | 36305 | A | 8 | BluLub |
| 363 | 36306 | A | 10 | BluLub |

Try with...
BluLub®
 Rollers!

- Lower wear
- Noise reduction
- Improved product stability
- Lower coefficient of friction
- Less energy consumption

TYPE A

TYPE B

Curvature radius

Fixing with plate and metal profile

Material: Resina acetica / Acetal Resin / Azetal or **BluLub**.
 Polyethylene UHMW-PE with reduced coefficient of friction and higher wear resistance.
 BluLub complies with the code of Federal Regulations of FDA. Linear expansion coefficient:
 $1.1 \times 10^{-4} \text{ } ^\circ\text{F}^{-1}$ ($2 \times 10^{-4} \text{ } ^\circ\text{C}^{-1}$) Operating temperature: -40 to 176 °F (-40 to +80 °C)

396 Guida a rulli flessibile Flexible roller guide / Flexible Röllchenführung

RANGE EXTENSION

Delivery: **Easy** **Standard**

| Part | Article-Nr. | Type | Colour |
|------|-------------|------|--------|
| 396 | 39601 | A | White |
| 396 | 39602 | B | White |
| 396 | 39603 | A | BluLub |
